Manitoba's total population was estimated at 1,177,765 persons as of July 1, 2006, up 1,817 persons from the revised April 1, 2006 estimate. Population growth continues on an annual basis, with Manitoba's increase since July 1, 2005 estimated at 3,617 persons, or 0.31%. A large portion of Manitoba's estimated population gain of 3,617 persons over the past 12 months was the result of immigration (8,884 persons). The immigration flow of 8,884 from July 1, 2005 to June 30, 2006 is the best since at least the July 1, 1971 to June 30, 1972 period.

We recorded an estimated net loss of 3,591 persons from other provinces through interprovincial migration in the first half of 2006, an improvement of 1,245 persons from the net loss of 4,836 persons in the first half of 2005.

Interprovincial migration is generally offset to some degree by other types of population movement (international migration, Canadian citizens returning from abroad, non-permanent residents and Canadians temporarily abroad). When these other forms of population movement were combined with interprovincial migration, Manitoba recorded an overall net migration gain of 1,323 persons in the first half of 2006. This net gain of 1,323 persons marked an improvement of 2,314 persons from the first half of 2005 net migration loss of 991 persons.

Net international migration for the first half of 2006 was 4,256 persons, up from 3,471 persons in the first half of 2005. This improvement is due to the increase in immigration that went from 4,024 persons in the first half of 2005 to 4,812 persons in the first half of 2006.

It should be noted that Statistics Canada has released revised components of population estimates for Canada, the Provinces and Territories. The revised estimates cover the time period from third quarter 2002 onward. This MBS report incorporates all revisions.

Table 6 presents the differences between the current population statistics contained in this report and those previously published by Statistics Canada for Table 1.
